The Industrial Development Branch is publishing this pamphlet with the express intention of stimulating interest on the part of Ontario manufacturers in the United Kingdom market. In presenting these statistics it is hoped that Ontario manufacturers in growing numbers will take active steps toward examining the United Kingdom market for possible export opportunities for their particular products.

The United Kingdom is one of the world's great importing nations. During the past four years it has imported on an average of \$11 billion worth of goods annually. During this period Canada, the United Kingdom's second most important supplier, has shipped an average of \$800 million worth of goods a year to that market. While over 75 per cent of our exports to the United Kingdom are in the form of raw materials or partially manufactured goods a number of Canadian manufacturers have recently found good markets there for fully manufactured goods. It is hoped that these statistics will assist Ontario exporters to expand their share of the United Kingdom market and encourage still other manufacturers to make their initial efforts in the export field.

This pamphlet is divided into five sections. The first section shows the value of United Kingdom imports by classes and divisions while the second shows imports by specific commodities. The third section shows selected leading Canadian exports to the United Kingdom. The fourth section shows certain forthcoming trade fairs and exhibitions in England and Scotland. The final section shows retail buying seasons in London.

At the time of publication, the entrance into the Common Market by the United Kingdom has not been decided. The facts presented here apply to the present trading position between the United Kingdom and Canada.

Several Government agencies assist the Ontario manufacturer to expand his export trade. The Ontario Government, through the Industrial Development Branch, maintains offices in London, England, as well as Chicago and New York. The Federal Government, through the Department of Trade and Commerce, maintains many trade offices abroad including, London, Liverpool, Glasgow and Belfast.
